**Other skills:** C, Data Science, MongoDB, R

## PROJECTS

---

### AI CodeExplainer

An AI-powered tool that explains code snippets using OpenAI API. Users can paste any code and receive instant explanations — great for learners and developers.

Tech Stack: React.js, OpenAI API

GitHub: <https://github.com/Sodi-Lepakshi/AI-CodeExplainer>

Live Demo: <https://ai-code-explainer-rho.vercel.app/> (To see results, export locally and use your API key)

### QuickBite- Food Ordering

A complete full-stack food ordering application allowing users to browse, order, and track food items. Includes authentication, cart management, and backend APIs for managing orders and menu items.

Tech Stack: React.js, Spring Boot, H2

GitHub: [https://github.com/Sodi-Lepakshi/QuickBite\\_Project](https://github.com/Sodi-Lepakshi/QuickBite_Project)

Live Demo: Coming soon

### Interview Readiness Analyser

A web app that helps users evaluate their interview preparation using interactive charts. It analyzes multiple aspects such as confidence, preparation level, and consistency.

Tech Stack: React.js, Chart.js

GitHub: <https://github.com/Sodi-Lepakshi/Interview-readiness-analyser>

Live Demo: <https://interview-readiness-analyser.vercel.app/>

## ACHIEVEMENTS

---

### YATS-2019

Recognized for outstanding skills and knowledge in astronomy, selected to represent the district in the prestigious Young Astronomy Talent Research competition.
